SUMMARY

Versatile and dependable professional with a strong foundation in web development and hands-on experience in warehouse operations. Skilled in PHP, HTML, CSS, and JavaScript, with a proven track record of building and hosting dynamic websites. In addition to technical expertise, I've worked in high-volume logistics environments at Amazon and Walmart, operating powered industrial trucks (PIT) and managing inbound/outbound inventory. Known for adaptability, attention to detail, and a strong work ethic across both tech and labor-intensive roles. Open to opportunities in technology, logistics, and operations, with a commitment to contributing value in any setting.

EXPERIENCE

WAREHOUSE ASSOCIATE

Amazon Fulfillment Centre – Brampton, ON

Jun 2024 - Jan 2025

- Operated powered industrial trucks (PIT) to manage inventory.
- Scanned and transported goods to designated storage locations.
- Collaborated with team to streamline receiving and picking operations.
- Maintained strict adherence to safety protocols and PPE requirements in a high-volume logistics environment.
- Assisted in training new associates on equipment handling, workflow processes, and safety compliance.

Walmart Distribution Centre – Mississauga, ON

Oct 2022 - Feb 2024

- Met individual cycle time and efficiency targets consistently.
- Ensured adherence to all policies and procedures.
- Inspected, sorted, counted, and verified inventory.
- Labeled, staged products, and put away inventory to location.
- Processed inventory kitting activities as requested.
- Processed credits for customer returns and controlled inventory for restock.
- Picked, packed, labeled, and checked customer orders for shipping.
- Meet all customer service Metric targets.

PHP WEB-DEVELOPER

Aug 2018 - Oct 2019

Advanced Hardware Technology Networks Private Limited - Mohali, INDIA

- Managed projects on object-oriented PHP programming with front-end technologies such as HTML, CSS and JavaScript.
- Integration of multiple data sources and databases into one system. Implemented database schemas that represent and support business process.
- Search Engine Optimization Leadership
 - Grew website interaction up to twice in one month by optimizing the interface more interactive.
 - Improved rank on web search results by submitting the website on online search engine portals with updated sitemaps.

PROJECTS

MP3PUNJABI.COM

Music sharing portal backed with Search Engine Optimization

- Designed, developed, and deployed a fully functional music download website using HTML, CSS, JavaScript, jQuery, PHP, and MySQL technologies, providing users with a seamless music browsing and downloading experience.
- Implemented user authentication system allowing only admin access for song and album management, featuring functionalities for uploading, editing, deleting, and modifying songs.
- Integrated an intuitive admin panel enabling comprehensive management of songs and albums, including analytics visualization for individual songs and albums to track user engagement and behavior.
- Utilized SEO techniques to optimize website visibility on leading search engines such as Google and Bing, achieving an impressive average ranking of 5th on Google.
- Demonstrated proficiency in leveraging database management systems like MySQL to efficiently store and retrieve music data, ensuring smooth website performance and scalability.

TECHNYGEN.COM

College Capstone Project

- Spearheaded the development of a dynamic web portal facilitating seamless project sharing among users, eliminating registration barriers for enhanced accessibility and user engagement.
- Empowered project contributors with robust functionalities to upload, manage, and analyze submissions, fostering a collaborative environment while catering to the needs of project seekers.
- Leveraged HTML, CSS, JavaScript, and jQuery as front-end technologies to craft an intuitive user interface, ensuring an optimal browsing experience for users across various devices.
- Implemented procedural PHP in conjunction with MySQL database management for efficient data handling and storage, ensuring scalability and performance of the platform.
